BIOGEOMON 2012
7th International Symposium on Ecosystem Behavior

July 15th - July 20th, 2012 Northport, Maine, USA
Hosted by the University of Maine

Themes:
- Long-term integrated monitoring and modeling
- Biosphere-atmosphere interactions
- Extreme events in ecosystem biogeochemistry
- Linkages among biogeochemical cycles
- Critical unknowns in nitrogen dynamics
- Biogeochemistry of peatlands
- Carbon cycling in poorly- and well-drained soils
- Experimental manipulations of ecosystems
- Trace element biogeochemistry and ecosystem impact
- Applications of isotopes and tracers
- Bio-energy production impacts in forested systems
- Biogeochemical aspects of ecosystem restoration and rehabilitation
- Ecosystem services and management
